2.				The attached is for info only. CPAS wants us to expand the mini-editing, primarily for their benefit, but they do not have the slots (2) or money _____ in '84 to do so. We don't either. Hence, the D/CPAS will be asking the DDI to ask you to jointly go forward to the Comptroller for slots and funds. I support such an approach.	STAT

MEMORANDUM FOR: Deputy Director for Administration

VIA: Director of Logistics

FROM: Chief   STAT
                 Printing & Photography Division, Office of Logistics

SUBJECT: DDI/OCPAS Requirement

    1. The purpose of this memorandum is to provide the Deputy Director for
Administration with information concerning a developing DDI/CPAS requirement
that impacts on the Printing & Photography Division, Office of Logistics
(P&PD/OL) Electronic Text Editing and Composition System (ETECS).

    2. The Office of Current Production and Analytic Support (CPAS) has
requested that the existing Mini-Edit system, which is a text processing and
editing system with direct access to ETECS, be expanded and upgraded to per-
mit the establishment of an automated archival database of the President's
Daily Brief (PDB) and the National Intelligence Daily (NID). Our analysis
of the CPAS requirement indicates that it will require two positions and new
funds in the amount of [   ] in fiscal year 1984 and [   ] in fiscal   STAT
year 1985. The Director of CPAS is forwarding a recommendation to the Deputy
Director of Intelligence that he solicit your support for a joint initiative
to the Comptroller in this matter.

    3. The use of the ETECS system as a secure archival database is cer-
tainly a logical extension of the ETECS system. However, since the primary
purpose of the Mini-Edit system is to provide a text processing capability
and not an archival capability, system support for an archival database con-
stitutes a new requirement for P&PD/OL. The benefits, in terms of rapid
search for information in an automated database, will accrue to the DDI.
Nevertheless, the system management responsibility for all data resident in
ETECS must reside in P&PD/OL; otherwise, we risk systems dysfunctions and a
diffusion of responsibility. For this reason, it is my view that P&PD/OL
must be authorized two additional positions before any further development
effort proceeds in the creation of an automated PDB and NID archival database
in ETECS.
